Quickway Steel Buildings are fully relocatable, made in the U.K. and can provide a fast, durable and economical solution to a wide range of accommodation requirements.

Designed in accordance with BS 5950, Quickway Buildings have been specified by national, regional and local companies throughout Britain, providing secure, visually attractive premises to suit a wide range of purposes.

**Sliding doors, translucent roof panels, plastisol coated steel cladding and steel personnel doors are fitted as standard features.**

Workshops, Stores, Warehouses, Garages...
Foundations

Quickway relocatable steel buildings may be sited on a variety of semi-permanent foundations. A concrete ringbeam or concrete slab with thickened edge beam gives a permanent foundation within days.

Delivery to your site

Moduless are transported by flat bed trailer, the load being 2.7m wide.

Erection

Erection is speedily completed by our experienced crews. However, the option of supplying your own labour force is available with or without the guidance of our supervisor.

Fast

Available in weeks, erection is fast due to the simplicity of the folding design.

Economical

Quickway Buildings offer a low initial cost with durable long life and may be sited on simple foundations.

Relocatable

Buildings may be re-sited several times without risk of major part replacement.

Extend or Reduce

Accommodation may be extended or reduced simply by adding or taking away modules.

Garages, Farm Buildings, Factories etc.

SPECIFICATIONS

Standard Features

FRAMEWORK
Structural steelwork painted one coat, high quality grey oxide primer.

CLADDING
P.V.C. coated box profile steel sheets, complete with all necessary flashings, fillers and fittings. No site cutting required.

TRANSLUCENT ROOF LIGHTS
Provide ample natural light. Approximately 10% of roof area.

SLIDING / PERSONNEL DOORS
Double leaf bi-parting steel framed doors, top hung, with security drop bolts and separate steel personnel door fitted to each gable end on 12m, 15m, 18m, 20m, 24m span buildings. On the 7.32m and 9m span buildings, the main door is fitted in one gable with a personnel door only in the other gable end.

Optional Features

CLADDING
Choice of P.V.C. paint coated finishes in a range of colours. Colour charts are available on request.

LININGS / INSULATION
By fibreglass material fixed between the exterior cladding and steel liner. Liner is painted bright white as standard.

RAINWATER GOODS
High quality P.V.C. guttering, downpipes and fittings.

PARTITIONS
Support steel work and cladding for internal divisions.

FIRE PROTECTION
1 hour fire protection to walls and columns.

ROLLER SHUTTER DOORS, ADDITIONAL SLIDING DOORS AND PERSONNEL DOORS
Typical Erection Sequence

1. Quickway Building modules are transported to site

2. A mobile crane is positioned and the erection sequence begins

3. The crane supports the roof panels and the walls are connected

4. The modules are unfolded and placed into position

5. The building is nearing completion - sliding doors will be fitted as standard

6. The finished building
